

Technology I use around my home.

(Scroll down for this weeks newsletter)

Reception Newsletter: 31.1.20

We are inviting you to contribute to your child's learning journal this week.

The focus is: Technology

The Early Learning Goal to reach says:

'Children recognise that a range of technology is used in places such as homes and schools. They select and use technology for particular purposes.'

Please complete the format in your child's book bag to add to the recent observations we have been making?

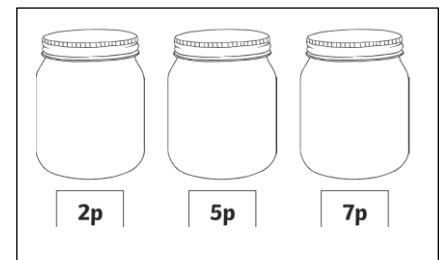

This may include:

- How they use remotes independently?
- Set alarm clocks?
- See technology in action such as timers, Alexa, use of google, sending emails to us, what happens when a traffic light fails? How do they use the technology with you to find out information? In shops where is there evidence of technology? How do remote control objects work?
- How do house hold objects work?
- What would you set a SAT NAV to include when on journey?

We have been continuing our work on money. This week it has been all about the value of coins and adding amounts together.

What coins would you need to make up amounts in the money jars ?

Thank you for your patience as we assess children for their next steps in reading? We will be available to anyone who wants more advice on this at the beginning of next term.

A massive thank you! to Mrs Lii for telling us all about her Chinese New Year celebrations with Max. We have had some super observations of your own experiences and these help us to add information in the area of 'People and Communities'. We shared these together as a class.
