

This week we have been learning all about 2D shapes. Some are a challenge as they increase in the number of sides. The children have been really enjoying a shape song which you may wish to play at home to support their knowledge of 2D shape names.

You can also make a shape collage by cutting out shapes and making them into shape pictures as we did last week. Send them into us, named, and in the post box at the dropping off point in the morning. We will put them in their learning journals and share them with the class.

Please click here to access the '[How to Support my Child with Reading](#)'

PowerPoint, you will find it on the school's web site.

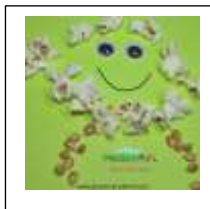

In addition, there will be another PowerPoint next week explaining how to support us with your observations at home.

For those parent's from our nursery you will be used to contributing already. We will give you some top tips for what makes a good observation. Your child's learning can be included in their journals towards our own teacher assessments.

*A journal records evidence of what a child knows and how they apply what they have been taught.*

We have been creative with a Harvest Celebration theme, such as making our own potato heads.

We have been making 2D shapes with Popcorn and finding out where popcorn comes from.

We have been making our names and mark making in glitter.

We have made our own large ball marble runs with pipes.

This built on our knowledge of how water flowed.

They have loved the 'Boom Whackers' which make different pitches when struck on like drum sticks on a hard edge surface,

We've been exploring our new musical instrument bag outdoors

We love the outdoor stage to perform on!

Which of you do they take after?
