Number of players can be unlimited but 4-6 players works best.

You will need a dice and small coloured counters as markers for each player.

Place all the coloured counters on the start bat.

Take it in turns to roll the dice and move around the board.

On each circle you will find a command/instruction.

You **MUST** follow the command in order to play the game.

You **MUST** also say which word in the command, is the imperative verb.

In addition to the command given, you can make it harder by using the coloured circles.

purple = whilst hopping

green = with your hands in the air

blue = with your eyes closed

The first to the finish is the winner!
