

Addition

LO: To add a 2 digit number to a 3 digit number using a number line by first going to the nearest 10.

Remember, when using a number line it is easier to jump to the nearest 10 and then add on the rest in sensible jumps.

Here's an example:

$$135 + 57 =$$

Now do these questions in you books (with a number line!):

1) $226 + 15 =$

6) $249 + 33 =$

2) $389 + 14 =$

7) $146 + 47 =$

3) $312 + 29 =$

8) $658 + 15 =$

4) $535 + 57 =$

9) $364 + 38 =$

5) $734 + 28 =$

10) $287 + 64 =$
